

**UROLOGY, HEMATOLOGY, ONCOLOGY, NEUROLOGY Soru Bankalarini gordunuz mu?**

BoardVitals Soru Bankasi Veritabani 31 Ekim 2017'e kadar deneme erisime acilmistir. [www.boardvitals.com](http://www.boardvitals.com) adresinde once **register** olup, sonra **log in** yapip kullanabilirsiniz. TIP'in 40 dalinda ozellesmis, ABD'de uzmanlik sinavlarina hazirlayici nitelikte coktan secmeli sorulardan olusur. Kendi dalinizi secebilirsiniz. Eczacilik, Dis Hekimligi, Hemsirelik, Fizik Tedavi ve Saglik Yuksek Okullari icin de soru bankalari bulunmaktadir.

**CARDIOLOGY Ornek Soru. Toplam 80,000 soru bulunmaktadir.**

**A 55-year-old man had a pacemaker initially implanted 8 years ago over the prepectoral area. Two months earlier, his old pacemaker reached end-of-life and he underwent replacement of the pacemaker using the existing leads. He is presenting now with dull pain, swelling, and mild erythema over the pacemaker pocket site that started 1 week earlier, together with low-grade fever. He reports some purulent drainage from the incision site. Blood cultures are drawn. The best course of action is:**

- A) To prescribe PO antibiotics for 2 weeks
- B) To admit the patient for IV antibiotics and pacemaker-system extraction
- C) To prescribe long-term suppressive PO antibiotics, as the pacemaker and lead system are too old to be extracted.
- D) To remove the recently implanted pulse generator on the left, leaving the old leads in place, and implant a new pacemaker system on the right prepectoral area.
- E) To incise and drain the pacemaker pocket and allow it to heal with secondary intention with daily change of dressing.
